Completness check of the product

Before installing the monitor, be sure to check that it is complete and all components are available.

The monitor kit includes:

Monitor	1 pc
Wall and flush mounting brackets	1 pc / 1 pc
Manual	1 pc
Set of wires with connectors for connection of alarm loops, external siren and home automation	1 pc
Sticker stencil for marking for the installation of a recessed bracket	1 pc
Resistors for alarm sensors	8 pcs
Installation screws	2 pcs

Electrical connection

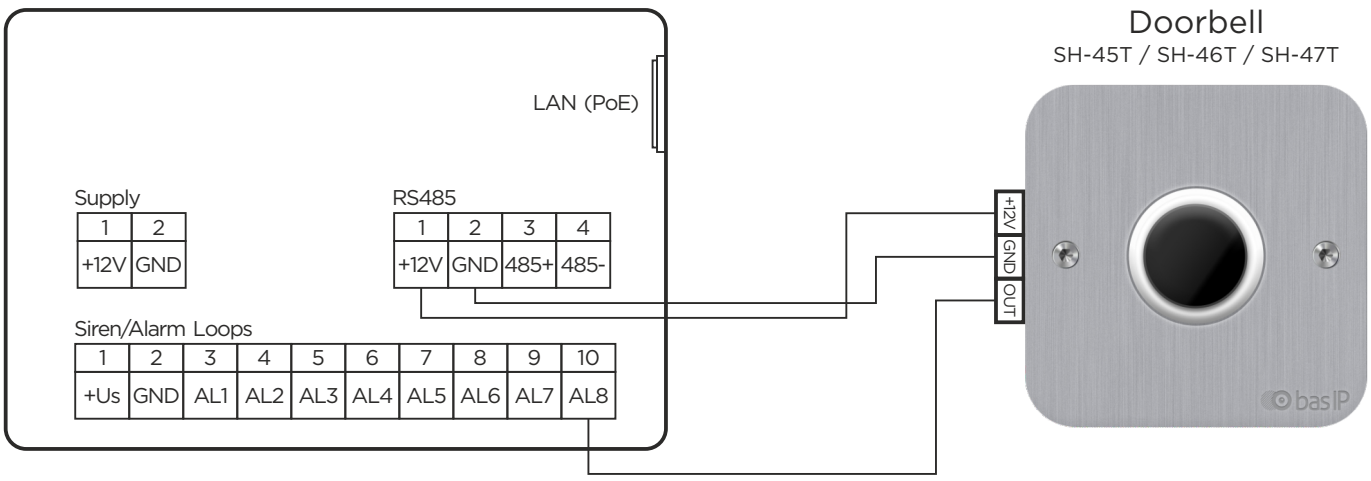

After verifying the device's completeness, you can switch to the monitor connection.

To connect monitor you will need:

- An Ethernet UTP CAT5 or higher cable connected to a PoE switch or to a normal switch/router.

Cable length recommendations
The maximum length of the UTP CAT5 cable segment shouldnot exceed 100 meters, according to the IEEE 802.3 standard.

- Power supply at +12 Volts DC and 2 Ampers.
- Wires must be brought for the connection of alarm loops and home automation (optional).

Mechanical mounting

Before mounting the monitor, a hole or recess in the wall with dimensions of 293 x 162 x 36 mm (for flush mounting) must be provided. It is necessary for switching of wires and installation of the monitor.

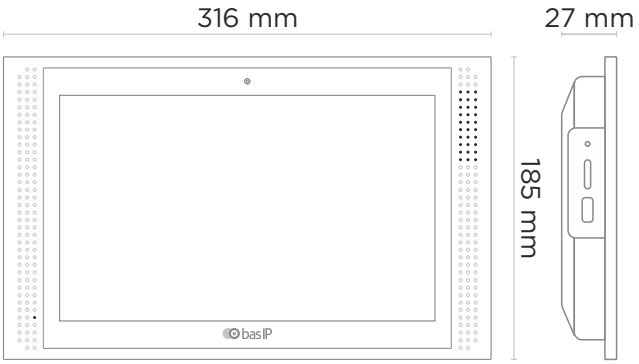

Attach the bracket on the outlet box using set screws and a phillips head screwdriver.

Installation of the monitor on the bracket is done from top to bottom.
