

Smart Interior Lock
Yale YDL325 Series

The YDL325 Series by Yale is designed to bring smart convenience to the doors inside your home — without compromising on style. Whether it's a bedroom or study room, this smart lever latch is thoughtfully crafted to blend seamlessly into your interior spaces.

It comes with two design options: a square rose for a modern, architectural finish, and a round rose for a softer, timeless look - allowing you to match the handle to your home's unique aesthetic.

YDL325 offers multiple ways to unlock, combining ease of use with the trusted security Yale is known for. You can unlock it using your fingerprint, through the Yale Home app via the built-in Bluetooth module, or with a mechanical key when needed — and when you need complete privacy, the internal forced lock gives you the same assurance as a traditional latch. And if the battery runs out unexpectedly, a simple Type-C cable connection lets you recharge and regain access immediately, making it a worry-free solution for everyday living. Best of all, the plug-in model allows for easy installation with no door modification required, making it an ideal upgrade for any interior room.

Created for all types of interior doors, the YDL325 Series is more than just a smart lock. It's a statement of thoughtful design and seamless technology that fits effortlessly into the flow of your daily life.
